- 1. Thin 13" display in an 12" form factor**
- 2. SSD enables phone-like responsiveness – boots in seconds, resumes in seconds**
- 3. Intel® Smart Connect Technology keeps your content updated***
- 4. Full size, backlit keyboard**
- 5. Available with Intel® Core i7 processors and powerful Intel® HD 3000 graphics***
- 6. Purposeful design**
 1. Materials chosen: aluminum, carbon fiber, soft touch on palmrest
 2. High brightness, premium display with bonded gorilla glass
 3. Backlit keyboard & large glass integrated button touchpad

Best-in-class build quality, form-factor & user experience

Most compact Ultrabook™

★ *Exclusive:* Most compact 13" in 12" form

Industry-leading craftsmanship & thoughtful design (stunning product with high performance)

- ★ *Exclusive:* Bonded ETE Gorilla Glass display for durability
- ★ *Exclusive:* Unique carbon fiber base – lighter & cooler
 - Machined CNC AL construction for durability and rigidity
 - Backlit keyboard for utmost productivity
 - Large glass buttonless touchpad w/gesture support

Superior Mobility (always updated and responsive)

- ★ *Exclusive:* Always updated with Intel® Smart Connect
 - Longer battery life at 8hrs
 - Location aware with Google Places & weather gadget
 - Boots & resumes in seconds – with Intel Rapid Start

Peace of mind

For consumers (Premium Phone Support)

- ★ *Exclusive:* 1 Year Software and hardware coverage
 - 24x7 phone support, chat and email support
 - Faster resolution (80% of calls are answered in <3 mins)
 - Expert technicians

For IT managers – enterprise-friendly

- Configuration Services
 - Custom Imaging
 - BIOS Settings
 - Asset Tagging
- ProSupport
- BitLocker Data Encryption with TPM

13.3" edge-to-edge Gorilla Glass display

- Frameless design enables smaller X&Y dimensions, meaning a more compact system
- Edge-to-edge hardened gorilla glass is bonded to the aluminum, so there is less flex and more durability. It is impeccably strong.
- Top hinge assembly is bonded together providing rigid & durable display.
- Aesthetically pleasing, more premium look

Unique Carbon Fiber Base

- Set inside the aluminum frame, carbon fiber is lighter in weight.
- Cooler on the lap
- Premium look and feel not found in any other Ultrabook

Precision cut, machined aluminum

- Superior build quality, fit & finish
- CNC aluminum or machined out of a single block of aluminum for rigidity and durability over stamped aluminum.
- The base is surrounded with a ring of precision cut aluminum to match the display back. A protective exterior, it provides durability with minimum structure and weight.

Machined aluminum construction

Smart design details

Backlit keyboard

- Be productive on the red-eye
- Standard full size, backlit keyboard for low-light situations

Diamond cut edge

- Surrounds entire display area
- Easy to open from any angle

Intel® Smart Connect Technology

Intel® Smart Connect Technology

- Always on, always updated with Intel® wireless & Smart Connect technology.*
- The XPS 13 wakes periodically and detects a network, constantly updating your calendar, email, etc., so you are always working on the most up-to-date info.*
- **The Experience:** You are rushing to your flight to Singapore. As you make your way through security, your notebook wakes up, detects the JFK network connection & connects, pulling in your latest meetings, emails and reports so you are sure you are working on the most up-to-date info in business class. You prepare emails on the flight. As soon as you step into the airport, your notebook detects a network, automatically wakes up & sends out the emails.*

Location aware

- Your laptop is location aware*, meaning if you change cities, gadgets like weather, attractions, restaurants, etc. are updated with that new location
- Types of location aware apps: Restaurants, Coffee, Bars, ATMs, Gas Stations, Attractions, Explore Nearby, Add+
- **The experience:** Your PC knows where you are, just like a smartphone. It's updated with your location when you arrive, automatically, without you having to change anything.*

Day in the life of a rising star powered by XPS 13

You are rushing to your flight to Singapore. As you make your way through security, your notebook wakes up, sniffs the JFK network connection & connects, pulling in your latest meetings, emails and reports so you are sure you are working on the most up-to-date info in business class.* Since you can't make the admirals club, you are happy to know that your laptop is connecting and making updates, and you don't even have to think about it.

You prepare to reply to emails on the flight, then catch some sleep. As soon as you step into the airport, your notebook detects a network, automatically wakes up & sends out the emails.*

It's bedtime at home, so before you even get your bags, you open up to Skype your family.* It's almost 9pm at home, so the fast responsiveness is appreciated. In a matter of seconds, you boot up and are connected and calling home. Glad you called, because you are able to see your toddler's first steps in phenomenal clarity from thousands of miles away. He's been working on that for a while.

After collecting your bags, you open again in the taxi (your content has updated in the airport via wifi), wondering if any of your meetings have changed.* Sure enough, you need to go to a new location, so you quickly notify your driver of your change of plans. Thank goodness for that backlit keyboard.

After a long day of meetings, you download a movie and some songs to entertain you.

When you walk back into your house, your laptop and phone sync with your home network*, and minutes later your new album is playing in the man cave.
